TAC*ONE Consulting:

6 Hour Advanced Concealed Carry / Personal Protection Course

This is NOT your average firearms course. You will participate in real life situations that are not offered in ANY OTHER CCW classes in Denver. TAC*ONE Consulting's Advanced CCW course is hands down the BEST around. It is designed for current CCW holders who would like to hone their personal protection skills for real life situations they may encounter. Students will be using Simunition Glock 17 pistols which shoot plastic projectiles containing colored soap. Until recently these "Force on Force" weapons were only available for Law Enforcement and Military use. You will engage role players with these weapons which cycle / recoil exactly like a Glock 17 9mm.

Major areas of emphasis are Personal Protection / Defensive Shooting Tactics , shooting from and around vehicles, barriers and engaging multiple targets . Learn the importance of "defensive shooting" and situational awareness so YOU not your attacker will control the outcome.

This course is 100% hands on practical application with no classroom. We will be running and gunning from the get go!

****Courses are taught by area Law Enforcement Officers****
