***Courses are taught by Law Enforcement ***

Women’s Concealed Carry

6 Hour Concealed Carry / Personal Protection Course:

This is NOT your average Concealed Carry Weapons training course. You will participate in real-life scenarios geared toward realistic situations that females encounter regularly. This kind of scenario-based training is not offered in ANY OTHER CCW class in Denver. TAC*ONE Consulting’s Women’s CCW course is hands down the BEST around. Students will be using Simunition Glock 17 pistols which shoot plastic projectiles containing colored soap. Until recently these “Force on Force” weapons were only available for Law Enforcement and Military use. You will engage role players with these weapons which cycle / recoil exactly like a Glock 17 9mm. Don’t waste your time attending another cheaper, shorter CCW class that will not truly prepare you to make what could be a life changing decision in seconds. Carrying a concealed weapon is a huge responsibility and the importance of effective training to do so should not be taken lightly. Questions will be answered and First-time firearm owners will receive advice on the type of firearm they may want to carry.

Major areas of emphasis are Home Firearm Safety, Basic Pistol, Personal Protection / Defensive Shooting Tactics. Learn the importance of “defensive shooting” and situational awareness as it pertains to you as a Woman. That way YOU, not your attacker, will control the outcome.
